Textbook: Larson, R. & Edwards, B., Calculus: Early Transcendental Functions, Metric Version, 7th edition, Cengage Learning, Inc., 2019.

Course Objective: The objective of the course is to introduce students to the concepts of integration, series, and their applications.

Course Description: Definite and indefinite Integrals of functions of a single variable. Fundamental Theorem of Calculus. Techniques of integration. Hyperbolic functions. Applications of the definite integral to area, volume, arc length and surface of revolution. Improper integrals. Sequences and series: convergence tests; integral, comparison, ratio and root tests. Alternating series. Absolute and conditional convergence. Power series. Taylor and Maclaurin series.

Prerequisite: Math 101.

Course Learning Outcomes: Upon successful completion of the course, a student should be able to

1. Estimate areas and definite integrals by Riemann sums.
2. Apply the Fundamental Theorem of Calculus.
3. Evaluate integrals using various techniques of integration.
4. Calculate the average value of a function, areas between curves, length of curves, volumes and surface areas of solids of revolutions.
5. Evaluate improper integrals and limits of sequences.
6. Apply convergence tests, evaluate the sum of some selected convergent series.
7. Find the interval and radius of convergence of a power series and express a function as a power series (Taylor and Maclaurin).

Grading Policy:

	Date	Time	Place	Material	Percentage
Exam I (14 MCQ)	TBA	TBA	TBA	TBA	23.33% (70)
Exam II (14 MCQ)	TBA	TBA	TBA	TBA	23.33% (70)
Final Exam (20 MCQ)	TBA	TBA	TBA	Comprehensive	33.33% (100)
Online Homework	On WebAssign (through Blackboard)				5% (15)
Recitation/Lab	Managed by the recitation instructor				5% (15)
Class Work	▪ The score is based on quizzes, class tests, or other class activities determined by the instructor. ▪ The average (out of 30) of the class work of each section has to be in the interval $[y-1, y+1]$, where $y = \frac{(median(Exam\ I)\% + median(Exam\ II)\%) * 3}{20}$.				10% (30)
				Total	100% (300)

Letter Grades: The letter grades will follow a grading curve, which depends on the average of all students enrolled in the course.

Exam Questions: The questions of the exams will be similar to the examples and exercises in the textbook.

Cheating in Exams: Cheating or any attempt of cheating will result in a grade of DN in the course along with reporting the incident to the higher university administration for further action. Cheating during exams includes (but not restricted to):

- Glancing at other students' papers.
- Talking to other students.
- Using mobiles, smart watches or any other electronic devices.

Other Exam Issues:

- No student will be allowed to take the exam if he/she does not show his/her KFUPM ID, or National/Iqama ID, or Driver's License in the exam hall.
- Students are not allowed to have their mobiles, smart watches, or any electronic devices in the exam hall. A violation of this will be considered an attempt of cheating.
- A student must sit in the seat assigned to him/her. A violation of this will be considered an attempt of cheating.

Missing an Exam: In case a student misses an exam (Exam I, Exam II, or the Final Exam) for a legitimate reason (such as medical emergencies), he/she must bring an official excuse from Students Affairs. Failing to do so, a zero score will be reported for the missed exam.

Attendance: Students are expected to attend all lecture and lab classes.

- If a student misses a class/lab, he/she is responsible for any announcement made in that class/lab.
- After warned **twice** by the instructor, a DN grade will be awarded to any student who accumulates
    - 10 unexcused absences in lecture and lab classes.
    - 16 excused and unexcused absences in lecture and lab classes.

The Usage of Mobiles in Class: Students are not allowed to use mobiles for any purpose during class time. Students who want to use electronic devices to take notes must take permission from their instructor. Violations of these rules will result in a penalty decided by the instructor.

Academic Integrity: All KFUPM policies regarding ethics apply to this course. See the Undergraduate Bulletin on the Registrar's website.
