#### King Fahd University of Petroleum and Minerals

# **Department of Mathematics & Statistics**

MATH 202 Syllabus, Term 212

Coordinator: Jaafar Almutawa

The Course Code and Name: MATH 202, Elements of Differential Equations

The Course Credit Hours: 3-0-3

**Textbook:** A First Course in Differential Equations by D.G. Zill, 10th Edition

**The Course Content:** First order and first-degree differential equations. Linear Models. Homogeneous differential equations with constant coefficients. Undetermined Coefficients: annihilator approach, reduction of order, variation of parameters, and Cauchy-Euler equation. Series solutions. Systems of linear first-order differential equations

### The Course Prerequisite: MATH 102

# The Course Learning Outcomes: Upon completion of the course, students should be able to:

- 1. Solve different types of first-order differential equations, including separable, exact, homogeneous, linear and Bernoulli equations.
- 2. Discuss basic theory of linear differential equations.
- 3. Solve real-world problems related to growth and decay, and heating and cooling.
- Find general solution of homogeneous linear differential equations with constant and variable coefficients.
- 5. Apply the methods of undetermined coefficients and variation of parameters to solve non-homogeneous linear differential equations.
- 6. Use series method to solve a second order differential equation.
- 7. Solve systems of linear homogeneous and nonhomogeneous differential equations.

The Course Grading Policy:

	Date	Time	Place	Materials	Percentage
Exam I (written +MCQ)	17Feb	06:30 – 08:30 PM	TBA	1.1 – 3.1	25% (75 pts)
Exam II (written +MCQ)	17Mar	TBA	TBA	4.1.1 - 4.6	25% (75pts)
Final Exam (written +MCQ)	TBA	TBA	TBA	comprehensive	35% (105 pts)
Class Work	<ul><li>It is based the instruct</li><li>The averag should be i</li></ul>	10% (30pts)			
HW	See the Weekly	5% (15 pts)			

## Missing The Midterm Exam:

In case a student misses an exam (Exam I, Exam II, or the Final Exam) for a legitimate reason (such as medical emergencies), he must bring an official excuse from Students Affairs. Otherwise, he will get zero in the missed exam.

**Exam Questions:** The questions of the exams are based on examples, homework problems, and exercises from the textbook.

**Cheating in Exams:** Cheating or any attempt of cheating by use of illegal activities, techniques and forms of fraud will result in a grade of **F** in the course along with reporting the incident to the higher university administration. Cheating in exams includes (but is not limited to)

- ➤ Looking at the papers of other students
- ➤ Talking to other students
- ➤ Using mobiles or any other electronic devices

**Attendance:** Students are expected to attend all lecture.

- >If a student misses a class, he is responsible for any announcement made in that class.
- A DN grade will be awarded to any student who accumulates
  - 0 8 unexcused absences in lecture classes.
  - 0 12 excused and unexcused absences in lecture and recitation classes.

(Note: the general rule for DN: 20% unexcused absences of the number of classes, and 33% excused and unexcused absences of the number of classes.)

Academic Integrity: All KFUPM policies regarding ethics apply to this course. See the Undergraduate Bulletin.
