## King Fahd University of Petroleum and Minerals

## **Department of Mathematics & Statistics**

MATH 202 Syllabus, Term 222

Coordinator: Dr. Bader Al Humaidi

The Course Code and Name: MATH 202, Elements of Differential Equations

The Course Credit Hours: 3-0-3

Textbook: A First Course in Differential Equations by D.G. Zill, 10th Edition

**The Course Content:** First order and first-degree differential equations. Linear Models. Homogeneous differential equations with constant coefficients. Undetermined Coefficients: annihilator approach, reduction of order, variation of parameters, and Cauchy-Euler equation. Series solutions. Systems of linear first-order differential equations

The Course Prerequisite: MATH 102

## The Course Learning Outcomes: Upon completion of the course, students should be able to:

- 1. Solve different types of first-order differential equations, including separable, exact, homogeneous, linear and Bernoulli equations.
- 2. Discuss basic theory of linear differential equations.
- 3. Solve real-world problems related to growth and decay, and heating and cooling.
- 4. Find general solution of homogeneous linear differential equations with constant and variable coefficients.
- Apply the methods of undetermined coefficients and variation of parameters to solve nonhomogeneous linear differential equations.
- 6. Use series method to solve a second order differential equation.
- 7. Solve systems of linear homogeneous and nonhomogeneous differential equations.

The Course Grading Policy:

	Date	Time	Place	Materials	Percentage	
Exam I	20/2/23	TBA	TBA	[1.1-3.1]	25% (100 pts)	
Exam II	27/3/23	TBA	ТВА	[4.1-4.7]	25% (100 pts)	
Final Exam	TBA	TBA	TBA	comprehensive	35% (140 pts)	
Online Homework		5% (20 pts)				
Class Work	<ul> <li>It is based on the instructor.</li> <li>The average y should be in t</li> </ul>	10% (40 pts)				

## **Exam Regulations:**

- > No student will be allowed to take the exam if he doesn't bring his KFUPM, National, or Iqama ID card with him to the exam hall.
- Students are not allowed to carry mobile phones and smart watches to the exam halls.
- A student must sit for the exam in the seat assigned to him.

**Exam Questions:** The questions of the exams are based on examples, homework problems, and exercises from the textbook.

Cheating in Exams: Cheating or any attempt of cheating by use of illegal activities, techniques and forms of fraud will result in a grade of DN in the course along with reporting the incident to the higher university administration. Cheating in exams includes (but is not limited to)

- ➤ Looking at the papers of other students
- > Talking to other students
- Using mobiles or any other electronic devices

**Missing an Exam:** In case a student misses an exam (Exam I, Exam II, or the Final Exam) for a legitimate reason (such as medical emergencies), he must bring an official excuse from Students Affairs. Otherwise, he will get zero in the missed exam.

**Letter Grades**: The letter grades are based on curved grading (a grading curve), which will depend on the average of all students taking the course.

**Attendance:** Students are expected to attend all lectures.

- Students need to strictly adhere to the attendance policy of the university.
- > DN-Grade will be assigned to the eligible students after their instructors have warned them twice.
- > If a student misses a class, he is responsible for any announcement made in that class.
- A DN grade will be awarded to any student who accumulates
  - o 9 unexcused absences in lecture classes.
  - o 15 excused and unexcused absences in lecture and recitation classes.

(Note: the general rule for DN: 20% unexcused absences of the number of classes, and 33% excused and unexcused absences of the number of classes.)

**Academic Integrity:** All KFUPM policies regarding ethics apply to this course. See the Undergraduate Bulletin.

Week #	Date	Text Sections	Торіс		Suggested Review Exercises
1	Jan. 15-19		Definitions and Terminology	10 <sup>th</sup>	6, 9, 13, 14, 18, 20, 23, 29, 32, 36, 38 6, 9, 13, 14, 18, 20, 23, 33, 36, 40, 42
		1.2	Initial Value Problems	10 <sup>th</sup> and11 <sup>th</sup>	2, 5, 13, 19, 22, 24, 26, 30
2	Jan. 22-26 2.2		Separable Variables	10 <sup>th</sup> and11 <sup>th</sup>	6, 10, 12, 21, 24, 26, 30, 32, 48
_		2.3	Linear Equations	10 <sup>th</sup> and11 <sup>th</sup>	4, 12, 15, 18, 20, 22, 28, 30, 36
3	Jan. 29-Feb. 2	2.4	Exact Equations	10 <sup>th</sup> and11 <sup>th</sup>	4, 5, 8, 12, 15, 20, 24, 28, 30, 33, 34, 42, 43
		2.5	Solutions by Substitutions	10 <sup>th</sup> and11 <sup>th</sup>	2, 6, 8, 10, 12, 16, 22, 25, 28, 29
	Feb. 5-9	2.5	Continue		
4		3.1	Linear Models: Growth & Decay, Newton's Law of Cooling	10 <sup>th</sup> and11 <sup>th</sup>	4, 6, 7, 15, 17, 20
5	Feb. 12-16	4.1.1	Initial and Boundary Value Problems	10 <sup>th</sup> and11 <sup>th</sup>	2, 4, 6, 10, 12, 13 (c), 14(d)
		4.1.2	Homogeneous Equations	10 <sup>th</sup> and11 <sup>th</sup>	16, 22, 24, 25, 28, 30
6	Feb. 19-21	4.1.3	Nonhomogeneous Equations	10 <sup>th</sup> and11 <sup>th</sup>	31, 34, 36 (a, b, c)
			Feb. 22-23: Saudi Foundation Day		
7	Feb. 26- March 2	4.2	Reduction of Order	10 <sup>th</sup> and11 <sup>th</sup>	4, 6, 10, 13, 16, 18, 19
		4.3	Homogeneous Linear Equations with Constant Coefficients	10 <sup>th</sup> and11 <sup>th</sup>	5, 8, 12, 14, 18, 22, 28, 32, 36, 42, 49, 50
8	March 5-9	4.5	Undetermined Coefficients:Annihilator Approach	10 <sup>th</sup> and11 <sup>th</sup>	2, 8, 14, 20, 23, 25, 28, 32, 34, 44, 48, 50, 61, 64, 68, 71
		4.6	Variation of Parameters	10 <sup>th</sup>	2, 4, 6, 11, 12, 18, 22, 24,

п	<del></del>			1
